ABOUT THIS GUIDE

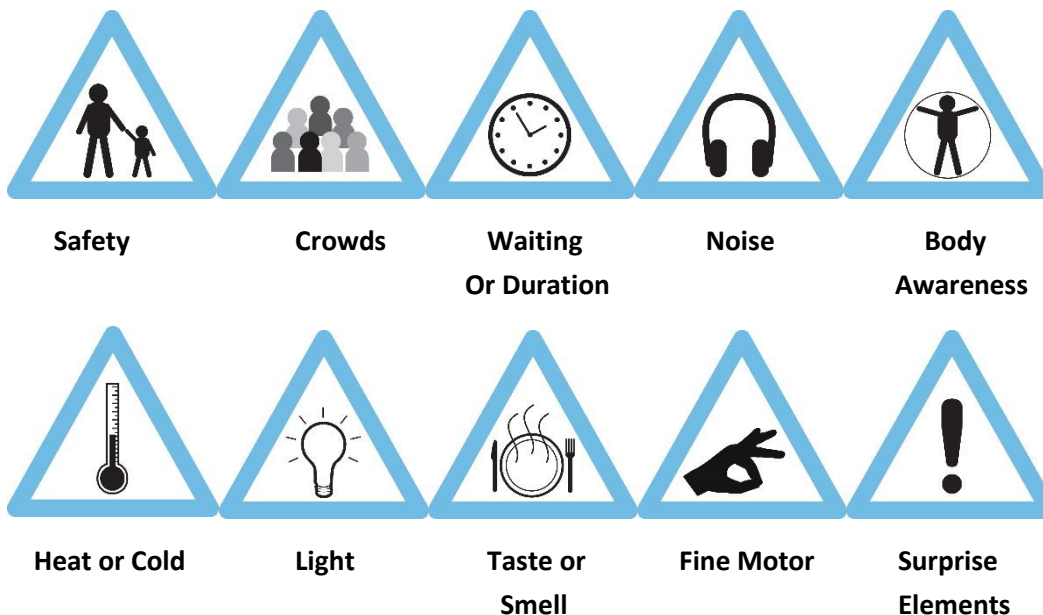

The information in this guide has been prepared by Autism Double-Checked in order to assist parents, or caregivers, of visitors with ASD when visiting Kennedy Space Center Visitor Complex.

The objective, throughout, is to give advance information about sensory, and other, issues that may need extra consideration for visitors with ASD. The Guide gives information about the nature of these issues and some possible guidance for how to handle them.

Due to the wide variety of issues that may arise for individuals with ASD, such guidance is general in nature. If you encounter something that is not covered in this guide, please seek the help of a Kennedy Space Center Visitor Complex crewmember.

Throughout the visitor complex, you will see signs with the Sensory Advisory Triangle.

Each Advisory Triangle is cross-referred to its section within this Guide.

FOR MORE INFORMATION, VISIT [KennedySpaceCenter.com](https://www.KennedySpaceCenter.com)

VISITOR COMPLEX

PREPARING FOR YOUR VISIT

Visit [kennedyspacecenter.com](https://www.kennedyspacecenter.com) to download and use the Social Story for visitors.

Crowds. In general terms, crowding is not a big problem at the visitor complex and may not be an issue for many visitors with ASD. This guidance is given for visitors who have a very low tolerance of crowds.

Noise and Light. Rocket launches are loud. Launches may be viewed from as close as 2 miles or as far as 8 miles, approximately. (Light is only a factor for nighttime launches).

Heat or Cold.

Smell or Taste.

September and late January are the least visited months.

At any time of year, launch days are busy and may be better avoided. Visit our website [kennedyspacecenter.com](https://www.kennedyspacecenter.com) and click on the tab for information about upcoming launches.

Visitors may wish to utilize noise-cancelling headphones for launch days. Dark glasses (if tolerated) may be helpful for night launches. Alternatively, visitors may choose to visit on a day without a launch.

November to February is the coolest season.

Please see later section for guidance on food service. Visitors with allergies or complex dietary restrictions should review that section and, if nothing suitable is identified, should bring their own food and beverage.

All visitors, regardless of ability should wear comfortable footwear. Do not forget water and sunscreen.

FOR MORE INFORMATION, VISIT [KennedySpaceCenter.com](https://www.KennedySpaceCenter.com)

@KennedySpaceCenterVisitorComplex @ExploreSpaceKSC KennedySpaceCenter KSCVC ExploreSpaceKSC

IMPORTANT GENERAL INFORMATION

Waiting or Duration. For visitors who easily become fatigued.

Noise. Levels at some of the presentations and exhibits can be loud.

Light. Many areas feature strong spotlighting in an otherwise darkened area.

Heat. Outside temperatures vary between warm and very hot.

Indoor areas are all air conditioned and the prevailing temperature is set to a level that is comfortable to visitors that do not have heat or cold sensitivity.

Proceed to the Information center (just outside the entrance). There are strollers and wheelchairs available for rent. Strollers are permitted in all parts of the visitor complex that have wheelchair access.

Proceed to Information (just outside the entrance) and request the use of the KSC SmartGuide.

The KSC SmartGuide has jacks for the use of headphones. Visitors who already have their own headphones are advised to use them since they are familiar.

Visitors with noise sensitivity, should bring noise cancelling headphones if they are familiar with them in other circumstances.

Parents or caregivers are advised to check each area beforehand. Visitors with light sensitivity should use dark glasses if they are familiar with them in other circumstances.

When inside buildings, it may help to have extra clothing layers for individuals who are sensitive to cold. For individuals who are sensitive to heat, they may need their lightest possible clothing

#JoinTheJourney

Waiting or Duration. Visitors who may become highly engaged with a particular exhibit /attraction may require considerable extra time. There are many things that a visitor may find very engaging. The following are very approximate guidelines of the time required for visitors who do not have this challenge:

Space Shuttle Atlantis®	1.5 hours
Shuttle Launch Experience®	30 minutes
3D space film in IMAX® Theater	1 hour (timed presentation, should not need extra time)
Journey to Mars: Explorers Wanted	30 minutes
Kennedy Space Center Bus Tour and the Apollo/Saturn V Center	2 hours
Dine With An Astronaut	75 minutes (timed event, should not need extra time)
Heroes & Legends	45 minutes
U.S. Astronaut Hall of Fame®	15 minutes

Quiet Rooms. Quiet Rooms are available for calming a visitor who has become overstimulated or overwhelmed. In Space Shuttle Atlantis®, there is a Quiet Room located in the Seat Mockup Room on the bottom floor by the Shuttle Launch Experience®.

Safety. Project Life Saver™ has coverage at the visitor complex.

SafetyNet by LoJack™ does not have coverage at the visitor complex.

For other services, check with your provider.

LOST PERSON HELP

- If a family member gets lost, locate a crewmember and ask them to request an “ALL RADIOS” announcement so that all crewmembers who have a radio may assist in searching.
- When the first security officer arrives, give them as much information as possible including; gender, age, race, clothing being worn, last known location, direction of travel if known, and communication abilities (verbal/non-verbal/understands verbal communication).
- It is recommended that you have a recent photo available on your mobile device so that you can share that with the security team.
- Ask the security officer to escort you to the Information center or the main exit, whichever is nearer, and stay there. This will enable the security team to locate you as soon as possible once your family member has been located.
- If you utilize an RF or GPS tracking system, inform the security officer of this, contact your service provider and ask them to cooperate with the visitor complex staff.

VISITOR COMPLEX

HEROES & LEGENDS FEATURING THE U.S. ASTRONAUT HALL OF FAME® PRESENTED BY BOEING®

Waiting or Duration. Entrance to the building is via two multi-media presentations. They are offered at frequent intervals.

The two presentations last for about 15 minutes, combined.

Noise. Soundtrack can be very loud.

Light. The second presentation is in 3D and requires 3D glasses for best viewing.

Visitors needing a shorter wait time may ask to enter the building via lower level.

It is possible to exit the presentation early. If an early departure may be necessary, select a position near the doors available for exit.

Visitors who are noise sensitive may need a family member to check noise levels in one presentation before entering the next one offered.

Visitors who are noise sensitive may wish to utilize the KSC SmartGuide.

Visitors who cannot tolerate wearing 3D glasses may not fully enjoy this presentation.

FOR MORE INFORMATION, VISIT KennedySpaceCenter.com

f @KennedySpaceCenterVisitorComplex **t** @ExploreSpaceKSC **i** KennedySpaceCenter **p** KSCVC **y** ExploreSpaceKSC

#JoinTheJourney

This presentation utilizes overhead strobe lighting for a short period of time.

Visitors who are sensitive to this type of lighting may wish to avoid this exhibit.

Body Awareness. The movie presentation includes shots that can be disorienting for some. These are strong enough to create the impression of motion.

Visitors who have challenges with body awareness may wish to avoid the presentation.

Surprise Elements. Some scenes in the movie presentation are dramatic and surprising.

Visitors who are easily startled may wish to avoid this presentation or be prepared to leave early, if needed.

During the presentation some strong gusts of air may surprise.

Visitors who are easily startled may wish to avoid this presentation.

Fine Motor. A number of interactive exhibits operate with touch screen technology.

Visitors who may become engrossed should allow extra time.

#JoinTheJourney

DINE WITH AN ASTRONAUT

Please also see section on Restaurants and Food Service.

Waiting or Duration. Presentation lasts approximately 75 minutes.

Call ahead for reserved seating on the perimeter of the room so as to allow for easy exit without disturbing others. Call the Reservations department at (855) 413-2146.

With reserved seating, wait until the presentation begins before occupying seats.

Food is served from a buffet. When first opened for service there may be long lines.

Ask a food service attendant to tell you when the buffet is about to open so that you can be in the line early on.

f @KennedySpaceCenterVisitorComplex **t** @ExploreSpaceKSC **i** KennedySpaceCenter **p** KSCVC **y** ExploreSpaceKSC

#JoinTheJourney

IMAX® THEATER

Waiting or Duration. Presentations are at set times.

Duration is approximately 1 hour.

Crowds. The theater holds approximately 400 people and is frequently filled.

Noise. Soundtrack can be loud.

Light. The presentation is in 3D and requires 3D glasses for best viewing.

Surprise Elements. IMAX is a very large-screen format and the movie presentation is dramatic.

Check for start times in order to avoid waiting.

You may need to be there 15 minutes before the presentation begins in order to obtain seating near an exit.

Leave early if attention span becomes a problem.

The last show of the day is usually the most crowded. The earlier shows each day are usually less crowded.

Visitors who are noise sensitive should check noise levels before deciding whether to stay.

Visitors who cannot tolerate wearing 3D glasses may not fully enjoy this presentation.

Visitors who are easily startled should either avoid this presentation or be prepared to leave early, if needed.

SPACE SHUTTLE ATLANTIS® INTERIOR

Light. Some parts of this area have strong spotlighting/lighting contrasts.

Fine Motor. A number of exhibits in the area require fine motor skills or hand-to-eye coordination or both.

Body Awareness. The Space Walk Simulator requires the ability to readily distinguish left from right.

Parents or caregivers are advised to check the area beforehand. Visitors with light sensitivity should use dark glasses if they are familiar with them in other circumstances.

Visitors who may become frustrated because of difficulties with these skills should avoid these exhibits.

Visitors who may become engrossed should allow extra time.

Visitors who may become frustrated because of difficulties with this skill should avoid this exhibit.

#JoinTheJourney

INTERNATIONAL SPACE STATION CLIMBING STRUCTURE

Crowds. This exhibit is a scaled model and can become crowded if a number of visitors enter at the same time.

Body Awareness. The mock-up has some very tight spaces.

The exit to the exhibit is a transparent tube and is located 2 floors above the ground.

Parents or caregivers are advised to assess whether crowding might be an issue for the visitor.

Visitors who have problems with enclosed spaces should avoid this exhibit.

Visitors who have anxiety about heights should avoid this exhibit.

f @KennedySpaceCenterVisitorComplex **t** @ExploreSpaceKSC **i** KennedySpaceCenter **p** KSCVC **y** ExploreSpaceKSC

#JoinTheJourney

RE-ENTRY SLIDE

Noise and Surprise Elements. Within the “approach” section, there is a foot-activated switch which triggers a simulated double sonic boom.

Body Awareness. This section has a slide, angled at 23 degrees. Use of the slide is supervised but only 1 visitor at a time is allowed on the slide. Safe use of the slide requires a legs-crossed, arms-crossed position.

Parents and caregivers should be careful to help visitors for whom this might be disturbing to avoid this trigger.

Visitors who cannot assume the correct position and then take the slide unaccompanied should avoid this. It is possible to have 1 parent or caregiver at the top of the slide and 1 at the bottom, when needed.

ASTRONAUT TRAINING SIMULATORS

Fine Motor. The exhibits in the area require fine motor skills or hand-to-eye coordination or both.

Surprise Elements. Some scenes in the simulators have sudden moves, turns, and noises.

Body Awareness. The simulator requires the ability to readily distinguish left from right.

Visitors who may become frustrated because of difficulties with these skills should avoid these exhibits.

Visitors who are easily startled may wish to avoid this presentation.

Visitors who may become frustrated because of difficulties with this skill should avoid this exhibit.

Visitors who may become engrossed should allow extra time.

#JoinTheJourney

SHUTTLE LAUNCH EXPERIENCE®

Crowds. This is a popular attraction. Prior to entering, each visitor is required to stand on their own “spot”. Each spot corresponds to a seat inside the simulator.

Noise. This simulation is loud.

Light. A flash photograph is generally taken at the entrance to the Shuttle Launch Experience.

Visitors who do not deal with crowds may need extra assistance to cope with this “boarding” process.

Parents or caregivers should view a “launch” from the viewing gallery in order to determine suitability.

Visitors who are sensitive to noise may need to use noise-cancelling headphones.

Visitors who are sensitive to light should request that no photograph is taken.

FOR MORE INFORMATION, VISIT [KennedySpaceCenter.com](https://www.KennedySpaceCenter.com)

f @KennedySpaceCenterVisitorComplex **t** @ExploreSpaceKSC **i** KennedySpaceCenter **p** KSCVC **y** ExploreSpaceKSC

#JoinTheJourney

Body Awareness. The launch experience has considerable vibration.

The experience requires that the seats tilt back. Although the actual angle is less, it is designed to give the impression of being tilted at 90 degrees.

Part of the simulation involves changes to the seat back to give the impression of G-forces.

Surprise Elements. Towards the end of the experience, there is a sudden change of movement which can result in a jolt.

Visitors who are sensitive to vibration should avoid this or have a parent or caregiver try it first and then ask for a “ride swap” (the visitor gets the next turn after the trial).

Visitors who have issues with tilting back to this extent should either avoid this experience or look for opportunities to practice reclining at steep angles before their visit.

Visitors who have challenges with body awareness should avoid the Shuttle Launch Experience.

Visitors who are easily startled should avoid the Shuttle Launch Experience.

#JoinTheJourney

KENNEDY SPACE CENTER BUS TOURS

Crowds. The tour shows the launch sites and transfers to the Apollo/Saturn V Center via 57-seater buses. These are very modern and comfortable.

Visitors who have challenges in dealing with crowds may find these buses too crowded and should request transfer in a mini-van. Call reservations 14 days prior to your visit if you wish to request mini-van transfers.
